**LinkedIn** | **Github** | **Leetcode** |**Portfolio**

## About Me

**B.Tech** student in **Artificial Intelligence & Data Science** with hands-on experience in building intelligent, data-driven applications and scalable systems. Strong in applying AI concepts, designing efficient application architectures, and solving real-world problems through practical projects.

## Technical Skills

| | |
|---|---|
| **Programming Languages:** | JavaScript , Python, Java. |
| **Libraries/Frameworks:** | React JS, Tailwind CSS , Node JS. |
| **Data Science & AI:** | Machine Learning, Deep Learning, Natural Language Processing |
| **Tools/Platforms:** | Git, GitHub, Data Structures, VSCode. |
| **Databases:** | MongoDB, MySQL, SQLite, Firebase. |
| **Soft Skills:** | Communication, Teamwork, Leadership. |

## Projects

**AI Helmet Detection System | Link** *React Js, AI&ML based Web App.*

- **Developed** an AI-powered helmet detection system using a YOLO-trained computer vision model to detect helmet usage in real time and accurately track helmet wear duration with daily safety streaks.
- Implemented a secure **front-end web application** using Flask, React, and JWT authentication, integrating analytics and reward mechanisms to promote consistent helmet compliance.

**ResuMate | Link** *React Js, TailwindCSS, Firebase, Gemini API, ReactIcons.*

- Built an **AI-powered Resume & Cover Letter Builder** that streamlined the job application process, reducing document creation time by 50% through automation.
- Integrated Gemini API for Enhanced Customization to deliver highly relevant and tailored resumes and cover letters based on user input, improving personalization and user satisfaction.

**AI-Powered Intelligent Traffic Monitoring System | Link** *Python, OpenCV, YOLOv8, Flask.*

- Developed a real-time traffic analysis system for vehicle detection and category-wise counting from live CCTV feeds.
- Detects and classifies vehicles (cars, buses, trucks, bikes) with high accuracy Counts vehicles category-wise and tracks movement.
- Calculates traffic density and provides live analytics on dashboard Generates alerts in critical congestion or accident-risk scenarios.

## Certifications

- Supervised Machine Learning: Regression And Classification – **Coursera**
- Meta Front-End Developer - **Coursera**
- Web Development - **Internshala**
- Python Data Structures and Algorithms - **Udemy**

## Achievements and Hobbies

- Best Candidate **NCC Camp Awarded** for outstanding **performance, leadership, and discipline** during NCC training camp activities.
- Demonstrated ability to learn from mistakes and fix errors independently.
- Completed group projects smoothly with **teamwork** and **responsibility**.
- 50+ Leetcode problems solved.

## Education

**Chhatrapati Shahu College of Engineering (CSMSS)** Chhatrapati Sambhajinagar, Maharashtra
B. Tech Artificial Intelligence and Data Science Nov 2022 - June 2026

**Shivchhatrapati College** Chhatrapati Sambhajinagar, Maharashtra
HSC Computer Science, Percentage: 74% Sept 2020 - Mar 2022
